## Our History

San Diego Grooming Academy was founded in 2016; however, our company's history supersedes our school's establishment. Ensuing several decades of prosperous, multi-platform entrepreneurship with consistent ascendance across the arts, Myke Ross (our founder) discovered his greatest passion working with animals through the art of professional pet grooming. Today, San Diego Grooming Academy continues to organize, as a safe-space for post-secondary education by providing comprehensive curriculum-based lectures and daily practical, hands-on training. Our campus is proud to offer persistent enrichment within the existing grooming community through our auxiliary workshops and by providing a local platform to host the leaders in our industry. Myke attributes his success to his perpetual thirst for knowledge, and nothing brings him more joy in life than being able to help others achieve their own greatness.

## IPG Approved School

*The IPG (International Professional Groomers) Grooming School Approval is a facility and industry best practices approval. To be IPG Approved recognizes that we follow current industry standards of health, safety and handling, sanitation, customer service, curriculum and graduation requirements. This recognizes our qualified instructors are certified professionals whose primary concern is demonstrating and teaching compassionate treatment and safety of the animals in our care while teaching safe and effective grooming and styling techniques.*

## Our Facility

Our campus boasts nearly 3000sqft of designated space including a large area upstairs, which can accommodate 70 guests, for seminars and workshops. As you enter the lobby you will be greeted by our receptionist, surrounded by our ProShop where we sell wholesale products for grooming professionals. Behind-the-scenes we house a temperature controlled kennel room, fully equipped bathing classroom, state-of-the-art grooming classroom and computer-lab with the student library nearby. We possess a full kitchen, with a separate break room for lunches, which has allowed us to traditionally celebrate each student's graduation with a family-style breakfast; as well as occasional pot-lucks near major holidays.

## Our Programs

Our expansive curriculum and limited class size will accommodate your educational needs whether you are an absolute beginner or an established professional who is seeking certification. If you are interested in any of our programs, we can accommodate you with a thorough tour of our facility (by appointment only) and a meeting with our administration to discuss which courses are best suited for your needs. Please Note: You must be 18 years or older and have a high school diploma or equivalent to enroll.

## Continued Education

As a school, we passionately advocate for continuing education within the grooming community by offering a unique selection of workshops to benefit groomers with all levels of experience. We are extremely proud to be recognized as an IPG approved school; and to facilitate a local arena for IPG track-testing, which provides a path for master-groomer accreditation. With the help of the SD Humane Society, we are able to host Pet First Aid and CPR Certification classes to promote preparedness among pet professionals and the general public alike. We periodically host local grooming competitions and celebrity guests for professional demonstrations to help you advance your career.
